

WHAT IS CLAIMED IS:

1. An apparatus comprising:

means for receiving an RF modulated signal having a modulation frequency outside the AM and FM band and containing baseband audio content;

5 means for converting the received RF modulated signal into an RF modulated signal

having a modulation frequency within the AM and/or FM band; and

means for transmitting the RF modulated signal having a modulation frequency within the AM and/or FM band to an audio reproduction apparatus for audibly reproducing the baseband audio content.

2. The apparatus according to Claim 1, wherein the baseband audio content is

Internet audio content.
